Fluidbed Dryer

Application:

Calcite
Dolomite
Quartz
Feldspar
Refractory materials

Performance:

Feedsizes up to 30 mm
Capacity 5 to 150 t/h
Water evaporation up to 10.000 kg/h

Features:

Most economic drying method in the mineral industry
Fluidbed drying with hot air flow
Product transport through fluidisation and shaking mechanism
Heating by oil or gas
Less space and low energy consumption
Low installation and maintenance costs
