

Pearl Mill

Application:

Mineral fillers
Ceramic fillers
Animal food
Chemical products
other powders

Features:

Low investment costs
Low operating costs
Economical energy consumption
High capacities yet small space requirement
Reproducible results
Defined grain size distribution
Adaptable to changing quality requirements
Continuous operation with short dwell times
High operational reliability
Grinding system with a high level of automation
Simple product changeover
On-line monitoring and adjustable particle size
Easy integration into existing plants
No mixing of product prior to feeding

Technical Data:

Type Series		MM3	MM5	MM7
Grinding pan volume	[Liter]	190	800	2.200
Drive rating up to	[kW]	50	200	500
Throughput up to (refers to solid material)	[t/h]	1,5	6	15
