Pendular Roller Mill

Application:

- ▶ Mineral fillers
- ▶ Ceramic fillers
- ▶ Chemical products
- ▶ Other soft to hard minerals

Performance:

- ▶ Fines capacity 1 to 6 t/h, depending on the hardness of the raw material
- ▶ Fineness $d_{97} = 45\mu$ to 150μ

Features:

- ▶ Vertical arrangement of grinding tools
- ▶ Grinding takes place between rotating rolls, hanging on pendulars, and a grinding ring
- ▶ Top cut is made in a classification zone on top of the machine
- ▶ Pendular rolls and grinding ring are made of wear resistant steel
- ▶ Integrated dynamic separator with separate drive
- ▶ Compact design with low space requirement
