

Table Roller Mill

Application:

Calcite
Dolomite
Gypsum
Barite
Bentonite
Clay
Other soft to hard minerals

Performance:

Fines capacity 1 to 20 t/h
Fineness $d_{97} = 10\mu$ to 63μ

Features:

Solid construction
High throughput depending on the hardness of the raw material
Grinding takes place under rotating rollers on a grinding table
Classifying takes place in the top section of the machine
Roller rings and grinding plate are made from wear resistant steel
Available as single wheel classifier or multi wheel classifier
